Sukajan care card

Gentle care for embroidered satin

> Your garment’s care label takes priority over this general guide.

01 Check the label

Read the care label before cleaning. If it specifies dry cleaning only, or you are unsure, consult a specialist cleaner about delicate dry cleaning.

02 Test the colour

Only if the label permits hand washing, dab a hidden seam with a damp white cloth. Stop if colour transfers.

03 Wash gently

Only if the label permits hand washing and no colour transferred in the test, hand wash in cold water with mild detergent. Rinse in clean cold water. Do not scrub the embroidery.

04 Dry flat

Support the garment and press out excess water with a clean towel. Dry flat away from direct sunlight.

05 Store with care

Once fully dry, hang on a broad padded hanger in a dry, ventilated space.

Avoid

- × Tumble drying
- × Wringing or twisting
- × Ironing directly over embroidery
